In order to implement your CSR projects effectively and efficiently it is very important to inculcate good CSR Standard Operating Procedures in CSR Project Management Systems. One of the SOPs is project Monitoring and Evaluation (M&E) to ensure that the said project achieves the required objective. Monitoring & evaluation also help to identify the gaps between planning & implementation.

In order to Monitor and Evaluate the projects, it is critical that the CSR team along with their implementing partners should understand what is M&E and what are the various parameters, indicators and the tools that are used in Monitoring and Evaluation of the CSR Projects.
